

**ABSTRACT****METHOD AND APPARATUS FOR APPLYING INFORMATION  
REMOTELY VIA A MOBILE DEVICE**

5 A method and apparatus for applying information stored remotely to an  
appliance via a mobile device are provided. The mobile device initiates the  
process by sending instructions to a computer system via a network. The  
instructions designate a first piece of information to be processed as well as the  
10 appliance to which the information is to be applied. According to the  
instructions, the computer system retrieves the first piece of information and  
converts the information to a document suitable for the appliance. The  
computer system then applies the document to the designated appliance.
